

Matt Bayne

Forward-Deployed Product Manager • Builder • Systems Thinker

Tulsa, OK • 405.320.4801 • mattbayne@gmail.com • github.com/mattbayne83

I build things to understand them — products grounded in how the energy business actually works, not how it looks from a conference room. I started in the field (field engineer → operational risk → front-line shale operations), then pivoted into product and technology leadership, carrying a systems-thinking habit the whole way. Today I turn complex authorization and dispatch workflows into intuitive digital experiences, closing the gap between how energy software works and how it should feel. 20 years in midstream oil & gas.

Forward-Deployed Product Management • Systems Thinking & Process Design • 0→1 Product Building • Agile Delivery (Azure DevOps) • Risk & Reliability Modeling • Power BI & Generative AI • Go-to-Market & Adoption • Cross-Functional Leadership

EXPERIENCE

Senior Product Manager — ONEOK, Tulsa, OK 2022 – Present

- Lead product strategy for 'Swift,' ONEOK's B2B platform for commodity trading and logistics — 400+ weekly active users across 100+ companies, directly enabling a \$1.5B revenue stream; drove a usability turnaround from the 3rd to the 50th percentile and doubled adoption of key features.
- Built the intake-and-prioritization system that cut cycle time 60% in 12 months across 220+ requests — turning an ad-hoc process into a repeatable engine.
- Built and funded the business case for a new 0→1 digital storage product — positive NPV and 30% IRR at just 3% adoption — and secured funding to ship it.
- Created the 'Foundations' maturity model — a systems view of reliability, service, and usability that drove 380% first-year improvement across nine metrics.

Director, Technology Enablement — Dynamic Risk (DRAS), Remote from Tulsa, OK 2020 – 2022

- Stood up a technology-enablement function — an engineering-consulting → SaaS pivot — and established NextGen risk-algorithm communities of practice.
- Drove customer demos, go-to-market proposals, and served as senior advisor on a flagship data-management engagement with a major North American pipeline operator.

Manager, Operational Risk — Williams Companies, Tulsa, OK 2017 – 2020

- Founded the enterprise Operational Risk function; trained 40+ practitioners and led a cultural shift from reactive compliance to proactive, risk-informed decision-making.
- Designed a capital-prioritization program covering 2,500 projects and \$1.5B in annual planned CAPEX spend.

Supervisor, Asset Integrity — Williams Companies, Tulsa, OK 2015 – 2016

- Consolidated three integrity-management programs into one; led a Board-requested risk-culture study that created a single enterprise Risk Matrix.

EARLIER CAREER

Operations Foreman — Access Midstream, Canton, OH 2013 – 2015

Startup & operations of 4 compressor facilities — 500+ MMCFD, \$140M+ CAPEX, 35 units, 11 direct reports.

Coordinator, Pipeline Risk & Integrity — Chesapeake Midstream, OKC, OK 2011 – 2013

Built in-house quantitative risk tools for 6,000+ mi of pipeline; led 60+ risk meetings/yr across 15 field offices.

Integrity Engineer — Chesapeake Midstream, OKC, OK 2009 – 2011

Created company-wide pressure-testing program; executed ILI runs; supported A&D due diligence.

Risk & Integrity Specialist / Field Engineer — ExxonMobil Pipeline Co., Houston, TX 2006 – 2009

ILI analysis on major crude/refined pipelines; led fuel-additive projects (\$500K AFE, 166% avg ROI).

EDUCATION

BS Mechanical Engineering, Magna Cum Laude 2006

University of Missouri, Rolla (Missouri S&T)
